

QuestaWeb Is First Software Vendor Certified for ACE Broker Interface

ACE Certification Translates to Distinct Business Advantage for QuestaWeb Customers

Westfield, N.J. -- April 6, 2009 -- QuestaWeb, Inc. (www.questaweb.com), a premier provider of Web-based integrated [global trade management \(GTM\)](#) solutions, today announced its certification on the Automated Broker Interface (ABI) for the U.S. Customs and Border Protection's (CBP) new [Automated Commercial Environment \(ACE\)](#). QuestaWeb is the first vendor to obtain ACE ABI certification, allowing the firm to transmit and receive data on imported merchandise through a direct electronic interface with CBP. Use of this interface translates to more timely, complete and accurate data.

QuestaWeb's certification means that only customs brokers and importers using TradeMaster^{QW} software can currently benefit from the enhancements the new compliance system brings. Better organized entry summary filing and response guides offer more descriptive information, which speeds up processing and eliminates delays. An innovative process to query and electronically override Census warnings virtually eliminates the need for the exchange of paper documentation. A new entry summary status notification messaging process keeps importers advised of CBP actions on an ongoing basis. Moreover, ACE permits two-way communication between the filer and CBP, allowing importers to automatically query key databases and files.

QuestaWeb CEO Leon Turetsky says, "QuestaWeb is committed to maintaining its position as a leader in the global trade management field. We were among the first companies to obtain ABI certification, so it is not at all surprising that we would be the first to achieve ACE ABI certification. While the testing process was demanding, certification brings untold business benefits to our customers and was well worth the effort. By being on the leading edge of GTM technology, QuestaWeb continues to deliver distinct business advantage to its customers."

QuestaWeb technology is the application of choice for growing numbers of Fortune 500 importers and exporters. With QuestaWeb's TradeMaster^{QW} GTM software, companies experience increased speed to market or production floor; enhanced revenue via fewer fines and audits; lower logistics rates; unparalleled ability to identify landed costs; and real-time capability to reconcile purchase orders and

commercial invoices. QuestaWeb's software technology, available in modules designed to solve every global trade need, delivers a distinct marketplace advantage for your technology investment.

About QuestaWeb, Inc.

QuestaWeb is a premier provider of integrated, Web-based global trade management software solutions. The firm's business model unifies import, export, logistics, compliance and financial processes including U.S. Customs clearance, [Foreign Trade Zone](#) inventory, landed costs, Harmonized Tariff Schedule classifications, [export licensing, denied party screening](#), product catalog, tracking, event management, and international document repository. The centralized global database maintains up-to-date compliance content and supports multiple languages, currencies and time zones. QuestaWeb was one of the first companies certified by U.S. Customs for electronic connectivity initiatives. The company's flagship product, TradeMaster^{QW} [Global Trade Management System](#), proactively manages export and import processes for importers, exporters, brokers and freight forwarders. It accelerates the flow of goods across the global supply chain, reduces inventory and operational costs and ensures compliance with ever-changing cross-border regulations.
