

# QuestaWeb Adds EU Excise Movement and Control System Module to Its Suite of GTM Solutions

*Advanced EMCS Module Joins QuestaWeb's Intrastat Module for European Union Members*

WESTFIELD, NJ - March 23, 2010 - QuestaWeb, Inc. ([www.questaweb.com](http://www.questaweb.com)), a premier provider of Web-based integrated Global Trade Management (GTM) solutions, announced today that it has developed its second European Union (EU) software component -- an automated Excise Movement and Control System (EMCS) -- to complement its EU Intrastat module. The EMCS module allows transmission and validation of the electronic Accompanying Administrative Document (e-AAD) via an Extensible Markup Language (XML) channel, while the Intrastat module compiles statistics on goods movement between EU member states. Notably, QuestaWeb subjected its EMCS module to the HMRC (HM Revenue & Customs) recognition process and successfully completed all requirements. HMRC granted QuestaWeb's EMCS module Internet Recognition and lists the firm on its website as a software developer with that designation.

The EMCS module gives both member states and businesses the capability to monitor all movements of excise goods in duty suspension within the EU. The Intrastat module automates required data reporting on the movement of goods between EU member states.

Leon Turetsky, QuestaWeb CEO, says, "Adding the Intrastat and EMCS software components to our suite of multi-national trade solutions represents yet another critical step in our business expansion efforts and places us closer to our overall objective of penetrating international markets. By offering advanced GTM solutions designed specifically for the EU marketplace, QuestaWeb recognizes both the prominence of the EU in global trade and the inherent flexibility of our software. Our technology can automate cross-border trade processes virtually anywhere in the world and combine transactions with rich content, helping supply chain parties move goods in a rapid, secure and compliant manner."

## About QuestaWeb

QuestaWeb is a premier provider of integrated, Web-based global trade management software solutions. The firm's business model unifies import, export, logistics, compliance and financial processes including U.S. Customs clearance, foreign trade zone, landed costs, Harmonized Tariff Schedule classifications, export licensing, denied party screening, product catalog, tracking, event management, and international document repository. The centralized global database maintains up-to-date compliance content and supports multiple languages, currencies and time zones. QuestaWeb was one of the first companies certified by U.S. Customs for electronic connectivity initiatives. The company's flagship product, TradeMaster<sup>QW</sup> Global Trade Management System, proactively manages export and import processes for importers, exporters, forwarders and brokers. It accelerates the flow of goods across the global supply chain, reduces inventory and operational costs and ensures compliance with ever-changing cross-border regulations.
